OBJECTIVE

Eager to leverage theoretical knowledge and practical skills gained through coursework and projects in a dynamic internship role within the Information Technology field. Seeking an opportunity to collaborate with a forward-thinking team, contribute to real-world projects, and further develop proficiency in areas such as programming, web development, and database management. Dedicated to delivering high-quality results and committed to continuous learning and professional growth.

WORK EXPERIENCE

Event Coordination and Technical Support

- Coordinated with the audience during an International Conference organized at Parul University for Management students, ensuring smooth proceedings and effective communication.
- Participated as a technical coordinator in the Management Fest organized by our institute, managing technical aspects such as audio-visual setups, IT infrastructure, and troubleshooting technical issues to ensure the success of the event.

PROJECTS

Developed a website for online voting system exclusively for university-level elections in collaboration with two teammates during the final year of my Bachelor's degree.
